

# Wayne Anstey

27-May-2021

## Personal Particulars

Name: WAYNE PETER ANSTEY  
Address: 15 Eden Croft, Weston-  
Super-Mare, Bristol  
BS24 7EW  
Telephone: 07958108886  
Email: wpa12@live.com  
Date of Birth: 20/09/1989

## Career Goals

I am a mid-level PHP web/software developer from Bristol, currently employed by a digital agency working with multiple technologies including PHP MVC, Laravel, JavaScript, HTML5, CSS3, Vagrant and NPM; among many others technologies such as GIT version control.

My career goals include working outside of the digital agency sector as a software engineer / software developer using PHP, moving towards a more product centric role within a software house; learning in more depth, newer technologies such as Laravel, VueJS or React.

Furthermore, my ideal role would be one that provides avenues for career progression.

Outside of working hours I take a keen interest in learning new technologies, where I am currently working to single-handedly, building a medium-to-large scale project using Laravel and VueJS.

## Employment History

July 2020 – Current

### TBT Marketing Ltd

Duties: Full-stack PHP developer, using Laravel 5.8 through to 8 building robust and bespoke web applications. in addition, I use Craft CMS to build some of the companies more generic websites, catering for some of the bigger names in Big Tech, i.e. **HPE, IBM, AWS, Lenovo and Dell.**

May 2018 – July 2020

**Somerset Design Ltd**

Duties: Somerset Design are digital agency focused on creating robust websites and web applications to its clients. Some of clients include Castle Combe, Gardiner Haskins and many more.

During my time at SD, I have gained further programming and web developer experience, working with the companies own bespoke CMS.

This CMS system unlike others, requires far more hands-on programming, due to its architecture built in Symfony; in turn, resulting in knowledge and experience working with an MVC php framework.

During this time, I have learned to work with **PHP MVC** based on **Symfony** framework, manage and develop my own projects, implementing **CI/CD** tools such as **Gulp.js**. Furthermore, this role has opened me up to some experience with server maintenance, using both **Vagrant** and live servers, **Git version control**, **MySQL**, **JavaScript** and **Sass/CSS3**, **HTML5**, **JSON**, **XML** and **Schema**.

Skills:

July 2016 – Sept 2017

**Circle Interactive Ltd.**

Duties: Using Drupal and CiviCRM during my internship at university to create aesthetically pleasing web sites for multiple clients (many of which were charitable organisations). This role gave me hands-on experience using CMS systems as occasionally there was the opportunity to use WordPress too. This role also taught me how to create modules for Drupal 7.

**PHP** programming experience, as well as front-end technologies such as **JavaScript** and **HTML 5**, **Sass** and **CSS**.

Skills:

May 2015 – July 2016

**Whiteland Software Engineering Ltd.**

Duties: During my time at Whiteland I worked with the company's core developer in testing and implementing an ERP system.

Skills: Working at Whiteland gave me an insight into the design and testing processes involved in building a piece of software.

## **Educational Background**

2014 – 2018

**DEGREE of BSc(Hons) Computing (SW) – University of the West of England (UWE).**

- Programming in C, C++, and Java.
- Web Programming: **Perl, PHP, HTML5, CSS3, JavaScript, JSON, XML, XSD, XSLT, AJAX.**
- Databases: **SQL.**
- Software Engineering: **Agile, Waterfall, Rational Unified Process, UML 2.0,** Software Testing.
- Computer Networks and Operating Systems.

2013 - 2014

**Access to Higher Education Diploma (Combined Studies) – South Gloucestershire and Stroud Colledge (SGS).**

The access to higher education – combined studies course was a 1 year, intensive course featuring 7 subjects. Passing this course with merits and distinctions allowed me to gain the necessary UCAS points to progress to University.

## **Additional Skills**

Language: Basic understanding of written and spoken Spanish

Employability Skills: I integrate and work well as part of a team. I consider myself to be determined and driven by my passion to excel in all walks of life. An example of my determination comes from recent years; where I have been contracted to work

40-hour weeks, whilst simultaneously enrolled in full-time education.

This in-turn links into my ability to time manage successfully, by distinguishing priority tasks to be completed and meet assignment/project deadlines.

Licenses: Full UK Driving License (clean)

Transport: Car
